

The Ulverston Victoria High School

Role of Honour

It has been well evidenced that work-related learning and employer contact brings a range of benefits to students (University of Reading, 2009). At Ulverston Victoria High School we continue to build strong links with a wide range of employers as we recognise that this can help boost students' attitudes and employability skills as well as informing them about the range of roles and opportunities available and help them understand how to make this a reality. (Adapted from Department for Education: Careers guidance and inspiration in schools: Statutory guidance for governing bodies, school leaders and school staff—April 2017)

We are very grateful to the following representatives of the employer organisations, schools and colleges who have supported our students during the last academic year.
